DIGITAL COMBINATION LOCK FLUSH FIT

With a zinc alloy housing, ten digit key pad, multiple fixing points and a secure key override, the flush digital combination lock is the perfect choice for a variety of applications. The unit can be used in private mode or public mode for permanent or temporary assignment with 4-digit user codes. A 6-digit sub-master code gives further flexibility and an 8 digit master code allows access to a large number of useful functions. Typical applications include lockers, cupboards, medical cabinets and other enclosures.
