FOR IMMEDIATE RELEASE

Practical Lessons for Single-Ply Roofing Design for Beginners

WOOSTER, Ohio [April 1, 2022] – Jerry Beall is pleased to offer an IIBEC-CEH & AIA-LU/HSW accredited 4-hr course for Architects and Roof Consultants new to Roofing and Roof Design Elements. The course objective is to offer insight and guidance into the elements and their variable facets that must be explored for proper roof design to beginners in the roof consulting and specifier community. Course participants are eligible for continuing education credits.

The course will introduce you to the basics for single-ply roof design. It is not meant to be all inclusive. There are a few disciplines that may or may not be pertinent to a given design situation. However, understanding the fundamentals will assist in developing the right questions to pursue answers to when engaged in any roof design activity.

A tour of a coated fabric manufacturing facility which includes the manufacture of a KEE roofing membrane is included. Registration is free. AIA CES and IIBEC CEH credits will be awarded upon completion of the presentation.

Class Location:

Seaman Corporation
Training Center
1000 Venture Blvd.
Wooster, Ohio 44691
