

Announcing the New AutoGate Vertical Pivot Gate Model VPG2490

www.AutoGate.com

Protection for possible entrapment during opening cycle

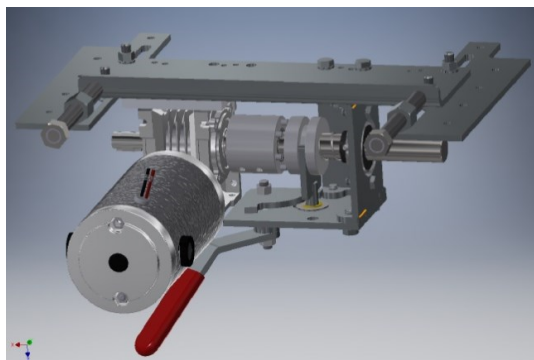

Genesis® Control Board

- LED Display for easy user interface and programming
- 6 inputs for open and closing monitored entrapment protection.
- Built in security breach monitoring.
- Adjustable gate speed control, controls or receives inputs from accessories such as lights, locks, audible devices, etc.
- Operational and fault logs to identify any issue.

Position Sensor

- Replaces our current need for limit switches.
- Sensor communicates directly with Genesis Board tracking exact gate position.

Right Angle Drive System (RAD)

- New 1/2 HP Gear Motor
- Anti-Back Drive for security and falling protection.
- Quick release coupler disengaging lever.
