

Composite Center Drain (-2) Shower Pans Double threshold, two wall models

ABE, Inc. double threshold center drain shower pans have a 1" flange on two sides for *AmeriWall* 2-wall shower enclosure applications and come with a self-caulking, wedge-lock drain and strainer. The sill adjacent to the left or right side of the threshold has an aluminum cap to receive a glass wall.

The white color of the pans is a very close match to *AmeriWall*. The pans are molded from a single piece of durable, stain and fungus resistant composite material and feature a non-slip surface that doesn't interfere with the flow of water.

Note: Final height and width dimensions of the delivered product shall be within reasonable tolerances of the quoted height and width dimensions.

MODEL	A	B	C	D	E
