# Tile Roofs

**MonierLifetile®**

*Changing the way people think about roofs.*

# Why Choose a Tile

For the way it looks, and the way it lasts.

The reasons can be summed up in one sentence: For the way it looks, and the way it lasts. Few other roofing products are as aesthetically appealing, and even fewer can be called truly lasting solutions. Tile roofs have passed the test of time in virtually every region and climate around the world—from Neolithic China as early as 10,000 B.C. to present day. Travel anywhere throughout Europe, the Middle East or South America and you will find that tile has been a major component of building throughout history.

Today, it is the ability to combine superior aesthetics and durability that distinguish MonierLifetile from its competition. From the multitude of tile profiles and colors, which are protected by our exclusive Non-Prorated, Fully Transferable Limited Lifetime Warranty, to Roof System Components, a comprehensive offering of components that can help enhance an installation, thereby improving the roof's performance qualities and prolonging its lifespan, only MonierLifetile offers a tile roof that unites both beauty and performance.

MonierLifetile is leading the industry to such an extent that it has evolved into more than a roof tile manufacturer; it has become a tile innovator.

Aesthetic Innovation.  
Taking form and function to new heights.

Our product development philosophy is one of Aesthetic Innovation. Our concrete tile roofs emulate the aesthetic qualities of natural roofing materials used throughout the Old World—wood, slate and clay—while protecting their structures with the durability of modern materials. We not only offer colors that replicate the nuances which appear in these materials naturally, we also provide color selections that complement today's design trends. For every creative vision, there's a range of colors from MonierLifetile to fulfill it. And as the industry leader, MonierLifetile builds upon the rich tradition of tile roofs by continually innovating new products and colors that are regionally relevant, timely and progressive.

Aesthetic Innovation is evident in our colors, profiles, even our functional components that can help enhance an installation's structural integrity.

The many styles and colors resulting from Aesthetic Innovation give our customers the ability to complement any architectural style, whatever and wherever it may be. The result is curb appeal that's impossible to achieve with any other roofing product.

# Roof?

## Roof System Components. A sum greater than its parts.

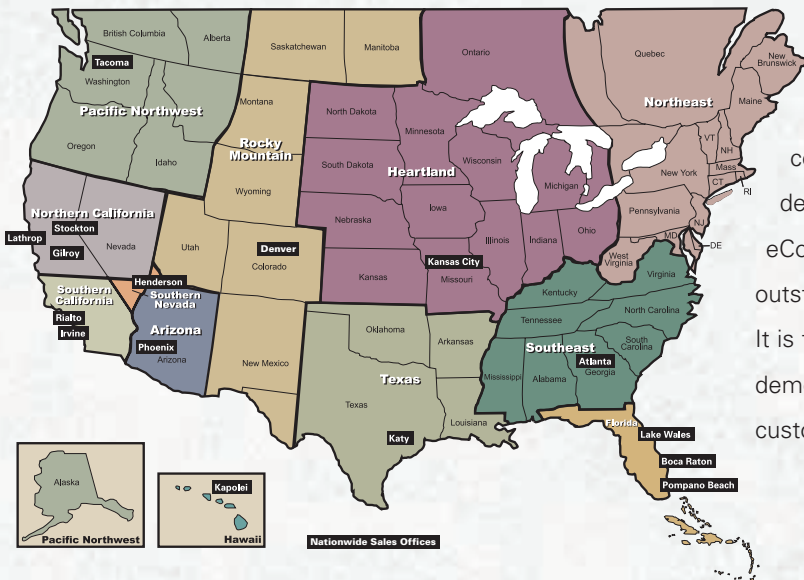

At MonierLifetile, a roof is not a mere tile covering but a dynamic, performing system that protects, breathes and ages with the structure. By studying roof performance characteristics and failure points, we have created Roof System Components—a collection of components that, when properly installed and used comprehensively, result in superior installations.

These components further reinforce the belief that MonierLifetile must strive to perfect not only a roof's aesthetic form, but also its primary function. Only then can we expect to provide our customers with a roofing solution unmatched by any other roof company.

## Service. The cornerstone of leadership.

Everyone at MonierLifetile shares the singular goal of better serving our customers. We're dedicated to the success of every commercial or residential project, ranging in scope from national new construction projects to the re-roofing of single family homes.

Through pioneering initiatives, we remain committed to delivering an unmatched combination of superior products that fulfill today's roofing needs and will help define future tile roofing trends. Examples of this commitment include value-added services such as a dedicated Technical Support team, training facilities, eCommerce solutions and our robust web site, plus outstanding customer service and knowledgeable sales teams. It is through these functions and many more that we demonstrate both our leadership and commitment to our customers' satisfaction and success.

Disclaimer: The printed colors shown in this brochure may vary from actual current tile colors. Before making a final selection, be sure to review actual tile samples and roof installations. Please contact your local sales office for further assistance.

Installation: Please consult current printed MonierLifetile Installation Guides for application recommendations.

Technical specifications do not constitute a warranty by MonierLifetile. The only applicable warranty with respect to this product is the Limited Lifetime Fully Transferable Non-Prorated Product Warranty for tile contained in MonierLifetile’s product literature dated most recently prior to the installation of this product on the owner’s roof. For more warranty information, please call 888-926-2585.

# Profile Overview

## Standard Weight

Mission "S"

Mission "S" is reminiscent of the Spanish roofs found on early missions in the Southwest, dramatically capturing the beautiful, rustic appearance of the Old World.

- Classic two-piece mission appearance with the durability of concrete
- Distinctive hue combinations create a beautiful, rustic appearance

Boosted  
Barcelona  
Caps

Boosted Barcelona is an available application of Barcelona which, when added to España field tiles, creates the appearance of a mortar-boosted tile.

- Available in colors that emulate the warm, rustic tones of natural clay.
- Superior manufacturing techniques make Boosted Barcelona simple to install—reducing installation costs.

Saxony  
Slate  
Shake

This beautiful design is representative of the roof styles found in England, Northern Europe and the Eastern Seaboard and is versatile enough to accentuate any architectural style.

- Unique colors and blends can enhance any architectural theme
- Available in a variety of surface treatments that emulate natural materials while offering the strength and durability of concrete tile

MonierLifetile  
Madera

MonierLifetile Madera is the most affordable, authentic replication of a hand-split cedar shake roof available. With its realistic wood shake surface, MonierLifetile Madera is flexible enough to complement any architectural style.

- Realistic colors that emulate the natural colors and textures of cedar shake
- Class A fire rating; superior resistance to wind and hail

# Finishing Touches *Standard Weight*

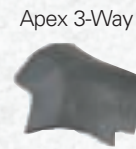

MonierLifetile provides all of the necessary tools for a durable and beautiful roof installation. Our trim tile is the most efficient and most attractive way to complete your roof. In addition to rake and ridge pieces, MonierLifetile manufactures hip starters and apex tile that ease installation and are protected by our Limited Lifetime, Fully Transferable, Non-Prorated Product Warranty for tile.

- Precision production techniques provide a consistent look throughout the project
- Colors and textures complement field tile; no need to mix color mortar
- Easier and faster to install than mortar balls; no second steps
- Reduces labor time and expense

## MonierLifetile Madera Finishing Touches

# Why choose to Reroof with MonierLifetile

*lightweight*

<6 lbs.  
Per sq. ft.

- **All lightweight tiles are less than 600 lbs. per square**
- **Structural enhancements rarely needed**
- **4,500 lbs. less than average 30 sq. mid-weight roof**

*Our "true" lightweight flat tiles are 125 lbs. lighter per square than our nearest competitor.*

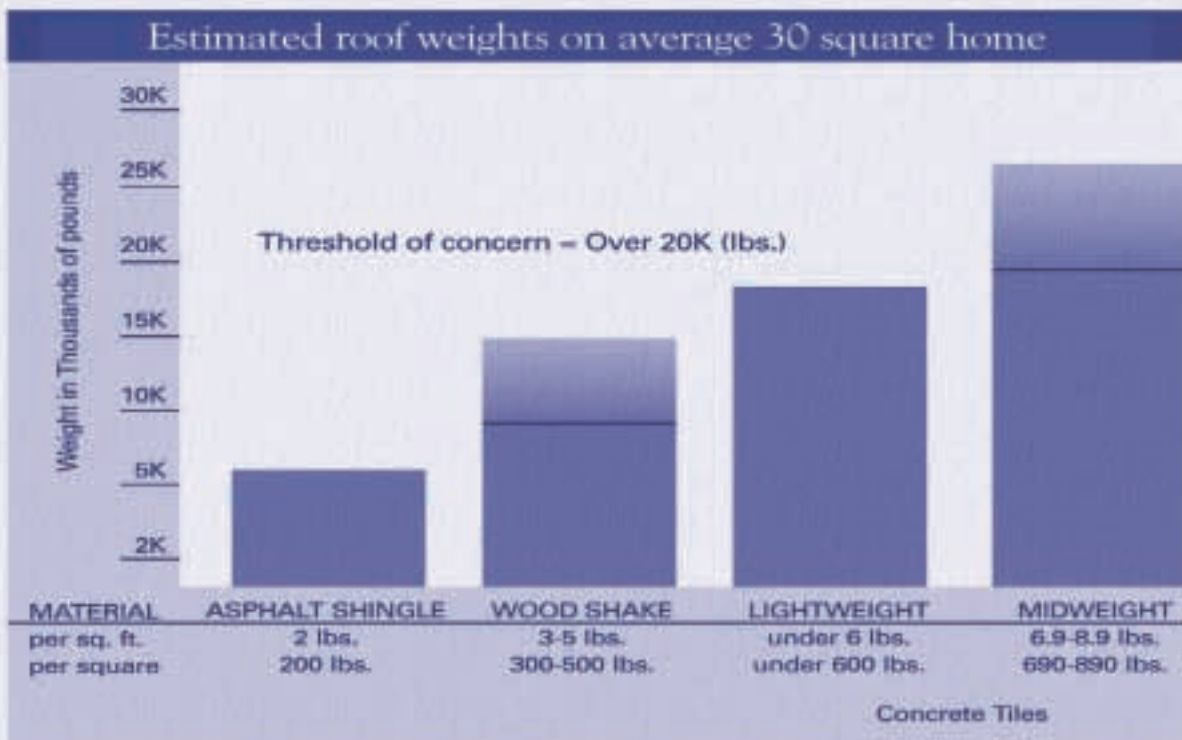

*Apart from sheeting, reroofing with Cedarlite and Duralite rarely requires structural reinforcement and, in most municipalities, no engineering report is required to obtain a permit.*

## Reroof Redefined.

MonierLifetile is the first and only manufacturer to create a sub-600 flat tile. Other manufacturers claim to make "lightweight" tiles, but they've usually modified a standard weight tile, with the actual weight varying from 6.9–8.9 pounds per square foot. We call them "mid-weight" tiles. MonierLifetile's Duralite and Cedarlite tiles are truly lightweight, designed from the outset to be sub 600 while still passing our stringent requirements for strength and weather resistance. To ensure you're getting the benefits of lightweight tile, MonierLifetile is the only choice for your project.

Lightweight tiles are tiles that weigh less than six pounds per square foot. Why does the weight of a roof tile matter so much? For a typical 30-square reroofing job, a mid-weight roof tile, at over seven pounds per square foot, can add up to 4,500 pounds to the weight of a roof.

# Weight?

When that much weight is added to your home, its structural integrity should be reviewed. This means your roof may require an engineering report and, depending on the results, you may need to have your home structurally enhanced. All of this adds extra cost and time to the job.

This is especially important in areas with steeply pitched roofs, since they put more weight on the walls of the home. Because all of our lightweight tiles fall below the 600 pound threshold, municipalities may not require engineering reports or structural enhancements, which could potentially save you thousands of dollars.

# Cedarlite®

THE ULTIMATE SHAKE REPLACEMENT.™

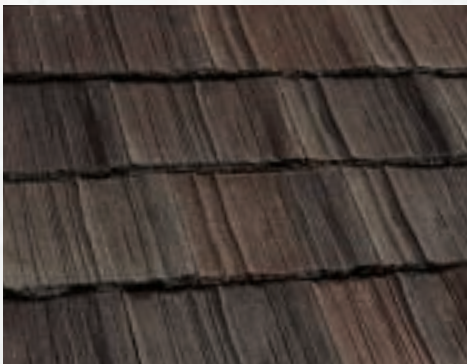

Known as "The Ultimate Shake Replacement," Cedarlite represents a quantum leap in concrete roof tile. Modeled after the highest quality hand-split cedar shakes, Cedarlite was developed with a unique manufacturing process that gives such a realistic appearance, most would be hard-pressed to tell the difference between it and real wood shake. Cedarlite features all of the variations and detail you would find in real cedar shake, while adding the benefits inherent in concrete roof tile. It's lightweight, fireproof and comes with our exclusive Limited Lifetime, Fully Transferable, Non-Prorated Warranty for tile.

# Duralite®

REAL TILE. REAL LIGHT.™

The beauty of Duralite lies in the fact that you get a multitude of designs to suit virtually any architectural style; the strength, durability and protection that concrete roof tile offers your home; and the advantages of a technologically advanced, lightweight design. With superior resistance to fire, deterioration and insect damage, Duralite also gives you peace of mind with our Fully Transferable Limited Lifetime Warranty.

## Barcelona

*This tile is designed to replace distinctive Spanish mission style roofs so popular throughout many parts of the country. The premium finish of Barcelona enhances the roof's appearance through a distinct shadow line down the center of the tile creating the appearance of two tiles while providing the ease of installation and durability of one. Barcelona captures the appeal of its Spanish ancestry in both architectural style and richness of color.*

## Villa

*Featuring the classic look and feel of clay tile, Villa offers a low-barrel profile that emulates a Mediterranean style but is suitable for other traditional designs as well. Available in a stunning array of colors, it offers the beauty and durability of traditional tile without the weight.*

## Saxony

*This beautiful design is representative of the roof style found in England and Northern Europe and is versatile enough to accentuate any architectural style. Saxony tiles are available in unique colors and blends and a variety of surface treatments that emulate natural materials while offering the strength and durability of concrete.*

### Shake

*This roof tile perfectly captures the rustic warmth and beauty of country living by recreating the look of hand-hewn shakes.*

### Split Shake

*The design features random patterns of coarse and smooth textures and faithfully mimics the appearance of a natural cedar shake roof. Reflecting the beauty and warmth of the country and its hand-hewn split shake roofs, Split Shake is available in a wide variety of rich and rustic colors.*

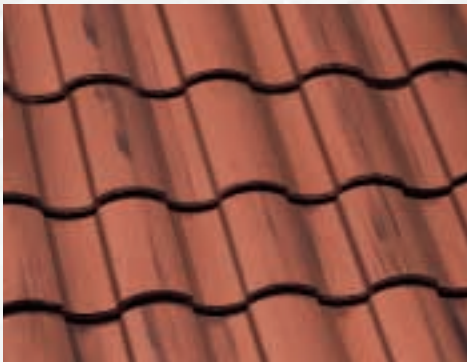

### Slate

*Slate is designed to complement the inherent beauty in French and Tudor architectural styles. Available in a broad range of colors, captures the appearance of expensive natural slate.*

# Finishing Touches *Lightweight*

MonierLifetile provides all of the necessary tools for a durable and beautiful roof installation. Our trim tile is the most efficient and most attractive way to complete your roof. In addition to rake and ridge pieces, MonierLifetile manufactures hip starters and apex tile that ease installation and are protected by our Limited Lifetime, Fully Transferable, Non-Prorated Product Warranty for tile.

- Precision production techniques provide a consistent look throughout the project
- Colors and textures complement field tile; no need to mix color mortar
- Easier and faster to install than mortar balls; no second steps
- Reduces labor time and expense

## Cedarlite Finishing Touches

## Duralite Finishing Touches

## Villa Finishing Touches

## Saxony Finishing Touches

**Piece-by-piece peace of mind.**

At MonierLifetile, a roof is not a mere tile covering but a dynamic, performing system that protects, breathes and ages with the structure. By studying roof performance characteristics and failure points, we have created Roof System Components—a collection of components that, when installed properly and used comprehensively, result in superior installations.

**Roof System Components:**

- Improve weatherproofing and “breathability” of a tile roof
- Prevent water damage
- Increase airflow and ventilation
- Provide aesthetically pleasing design elements

These components further reinforce our belief that we must strive to perfect not only a roof’s aesthetic form, but also its primary function. Only then can we expect to provide our customers with a roofing solution unmatched by any other roof company.

 **Regional Recommended System**

Products on the following pages that are designated with the Regional Recommended System icon have been specifically chosen for their ability to perform in your geographic region.

**Vents (Page 39-40)**

It’s estimated that 75% of homes have deficient attic ventilation, where soaring temperatures can drive up energy costs and diminish the lifespan of roofing underlayments. Alleviate many of these concerns with MonierLifetile’s vents. These products ensure proper ventilation and help reduce energy costs, with aesthetics that are superior to other field vents. MonierLifetile standard and premium vents provide the necessary benefits for longevity and performance.

**Hip & Ridge (Page 37)**

An optimal roof installation includes MonierLifetile’s Roof System Components for hips and ridges, which prevent wind-driven rain, snow and other debris from entering the peaks and corners of a roof. These specialized components include rollable hip and ridge seals and ridge risers that block the elements while allowing adequate ventilation.

**Valleys (Page 39)**

A roof performs optimally when water is prevented from collecting on the deck—which can damage the underlayment and cause the roof deck and underlying structure to rot. To help ensure the proper channeling of water off the roof and thereby protect its structural integrity, MonierLifetile offers ribbed valley metals as part of its Roof System Components. MonierLifetile’s valley metals are specifically manufactured to protect the valleys of concrete tile roofs.

**Fasteners (Page 35)**

In superior roof installations, no detail is overlooked. MonierLifetile’s collection of Roof System Components includes all the necessary elements for such installations, right down to the fasteners. Beyond standard roofing nails typically used according to local code requirements, MonierLifetile also offers premium fasteners that offer added performance and security.

### Flashing (Page 36)

To help ensure the overall performance of a tile roof, it's critical to keep water, snow and debris from entering joints where the walls meet the roof deck. The use of flashing creates the proper barrier in this situation, and the Roof System Components collection from MonierLifetile offers several types of flashing options so you can choose your optimal level of performance and protection.

### Eaves (Page 34)

Proper eave treatment creates a finished look for the roof and enhances its overall functionality. Eave closures from MonierLifetile's Roof System Components elevate the first course of tile to the proper height, complete the overall aesthetic of the roof, and prevent infestation. Several eave treatment options are available, all of which are specifically designed to fit MonierLifetile tile profiles.

### Battens (Page 33)

Battens are a crucial aspect of MonierLifetile's Roof System Components and any high performance installation. MonierLifetile's offers products to provide positive anchoring for each tile, raise each tile off the roof deck for enhanced water flow and ventilation and provide a stable surface for safer traffic during installation.

### Rake & Gable End (Page 38)

MonierLifetile's Roof System Components include rake and gable end products that provide for an installation with increased performance and aesthetics. These products offer added protection against weather, animal infestation and debris accumulation while integrating seamlessly with the overall appearance of the installation.

### Miscellaneous (Page 40)

Additional products that help in creating an optimal tile roof.

### Tools (Page 38)

Use the best tools for the job. MonierLifetile offers the Quik Drive® Screw Gun and roofing specific screws for fast, easy and reliable fastening.

### Oxides (Page 39)

Oxides are the pigment used to color the mortar sometimes used to seal tiles along the hip and the ridge. The oxides that MonierLifetile provides are specific to the tile colors offered and are the same pigment used in the manufacture of the tiles.

# Battens

## Elevated Batten System™

- Allows water to pass freely beneath the batten
- Prevents water damming that can damage the roof deck
- Significantly reduces nail penetrations
- Provides an effective thermal barrier
- Suitable for all tile profiles
- Reduces labor and installation costs
- Construction grade or better Douglas Fir, graded for split shake, wane and knot size
- Patent # 6,536,171 B1

Part Number	Description
90002	EBS - Elevated Batten System 1" x 3" x 8'
90120	EBS - Elevated Batten System 1" x 2" x 8'

## Batten Extenders

- Elevated to allow water to pass freely beneath the extender
- Perfect for cut tiles at the valley and other roof intersections
- Suitable for all tile profiles
- Injection molded plastic

Part Number	Description
90001	Batten Extender 18"

# Eaves

## Vented Eave Riser

- Enhanced aesthetics at the eave
- Superior fit for most MonierLifetile profiles
- Provides tile space ventilation
- Allows for reduced energy consumption
- 26 ga galvanized steel, painted
- Patent # D483 133

Part Number	Description	Profile
90740	Vented Eave Riser - Metal - Black	Lightweight Barcelona
90743	Vented Eave Riser - Metal - Terra Cotta	Lightweight Barcelona
90754	Vented Eave Riser - Metal - Black	Lightweight Villa
90757	Vented Eave Riser - Metal - Terra Cotta	Lightweight Villa
90750	Vented Eave Riser - Metal - Black	Lightweight Saxony
90753	Vented Eave Riser - Metal - Brown	Lightweight Saxony

## Eave Closure

- Elevates eave course to the proper height
- Helps to prevent wind driven rain, and vermin from damaging the roof deck
- Provides a finished appearance to the eave area of the roof
- Available for all MonierLifetile profiles
- 26 ga galvanized steel, painted

Part Number	Description	Profile
9ECMS1	Eave Closure - 28 ga Metal - Black	Standard Weight Mission "S"
9ECMS6	Eave Closure - 28 ga Metal - Terra Cotta	Standard Weight Mission "S"

90050	Eave Closure "T" 7/8" - 28 ga Metal - Brown	Cedarlite/MonierLifetile Madera

# Fasteners

## Quik Drive® Screws

- ASTM 641, Class 1 Screws - Roofing Specific
- Single screw installation improves tile walkability
- Suitable for all tile profiles
- 10 ga galvanized steel

Part Number	Description
90210	Quik Drive 2" Screws
90211	Quik Drive 2-1/2" Screws

## Adhesive OSI RT 600

- Designed for tile repairs
- Meets uplift requirements up to 55' above grade
- Withstands high temperatures (77° F)
- Long life expectancy
- Quik & easy to use, reducing labor and installation costs
- Suitable for all tile profiles

Part Number	Description
90039	Adhesive OSI RT 600 - Black

## Boosted Barcelona Wire Ties

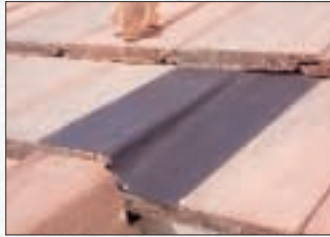

- Fasteners and instructions for Boosted Barcelona installations.
- Wire ties and instructions are included in the pallet of field tile. Order additional through this part number
- 16 ga galvanized steel

Part Number	Description
90781	Boosted Barcelona Wire Ties & Installation Instructions

# Flashing

## Wakaflex

- Universal flashing suitable for all roof abutments and all tile profiles
- Excellent alternative to lead or metal flashing
- A must have for tricky details and small repairs
- Easy to handle and self-adhering for a fast installation, no special tools or soldering required
- Provides a clean, finished appearance
- Paintable to match surrounding field tiles
- No environmental concerns
- Polyisobutylene (PIB) with aluminum webbing and butyl adhesive edges

Part Number	Description
90912	Wakaflex 11" x 33' - Black

## Ribbed Tile Pan

- Suitable for all tile profiles
- Double ribs help to prevent lateral flow of water across roof deck
- Creates a channel for water to flow off of roof
- Elevates tile and battens out of water flow area
- Flat edge allows sealing and fastening outside of water flow area
- 26 ga galvanized steel

Part Number	Description
90098	Ribbed Tile Pan - 26 ga - Galvanized

## Flash Bar

- Metal flashing for chimneys and other rising structures
- Quik and easy installation
- Provides superior water protection
- 26 ga galvanized steel, painted

Part Number	Description
90960	Flash Bar

# Hip & Ridge

## Figaroll

- Universal ridge vent and weather block
- Cost effective, code-compliant ventilation
- 8 Square inches per linear foot ventilation area provides venting at optimal location while reducing field vent requirements
- Rollable installation reduces labor and installation costs
- Butyl adhesive strips provide a weather-tight seal
- Flexible enough to fit any tile profile

Part Number	Description
90430	Figaroll 11" x 33' - Charcoal

## Zephyr Roll™

- Universal ridge vent and weather block
- Cost effective, code-compliant ventilation
- 8 Square inches per linear foot ventilation area provides venting at optimal location while reducing field vent requirements
- Rollable installation reduces labor and installation costs
- Butyl adhesive strips provide a weather-tight seal
- Two sizes fit all tile profiles

Part Number	Description	Profile
90744	Zephyr Roll 11" x 33' - Granite	Villa/Saxony/MLT Madera/Cedarlite
90746	Zephyr Roll 13.4" x 33' - Granite	Mission "S"/Barcelona

## Ridge Riser

- Elevates ridge board to proper height
- One size fits all tile profiles
- Use of a common 2" x 2" nailer on all tile profiles reduces lumber costs and eliminates the need to inventory multiple ridge board sizes
- 16 ga galvanized steel

Part Number	Description
90760	Ridge Riser

## Rake & Gable End

### Gable End Rubber Wedges

- Easily conforms to the shape of the tile to fill space created by overlapping tiles at the rake
- Maintains the look of a traditional wood shake rake line
- Helps eliminate the migration of vermin and debris under the roof system
- Low cost, easy to install

Part Number	Description	Profile
90137	Gable End Rubber Wedges -Black	Cedarlite/MonierLifetile Madera

### Metal Rake Trim

- Provides a finished appearance to the rake line
- Helps to prevent the migration of debris and vermin under the roof system
- Easy to install
- 26 ga galvanized steel, painted

Part Number	Description	Profile
90136	Metal Rake Trim - Brown	Cedarlite/MonierLifetile Madera

## Tools

### Quik Drive® Screw Gun Kit

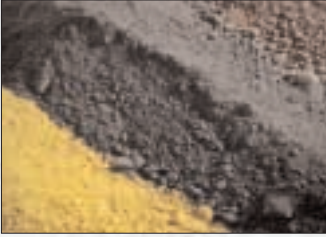

- Screw gun drives approximately 6 squares per battery charge (individual results may vary)
- Suitable for all tile profiles
- Screw installation improves tile walkability
- Adjustable depth control
- Full year manufacturer's warranty
- Kit includes: case, cordless gun, charger, 2 18V batteries

Part Number	Description
90165	Quik Drive Screw Gun Kit

## Oxides

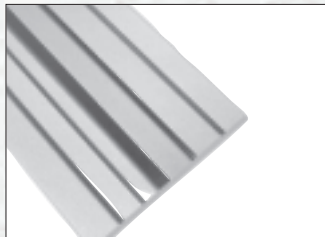

### Oxides

Part Number	Description
90XC7027	Red

## Valleys

### Ribbed Valley Metal

- Suitable for all tile profiles
- Universal for all slopes and tile applications
- Raised ribs elevate tile and battens out of water flow area, helping to prevent debris accumulation
- Channels water off of the roof, preventing lateral flow across the roof deck
- Flat outside edges allow fastening and sealing outside of the water flow area
- 26 ga galvanized

Part Number	Description
90632	Ribbed Valley Metal 1" Ctr. Diverter - 26 ga - Galvanized

## Vents

### Ubbink Vent

- 35 square inches of Net Free Airflow for increased attic ventilation, resulting in reduced cooling costs
- Screen, hood and undercloak included
- Tile clip for maximum wind uplift resistance
- Paintable to match field tile
- Lightweight yet durable
- Manufactured to fit all tile profiles
- Ultraviolet and flame resistant PVC-U

Part Number	Description	Profile
90009	Ubbink Vent (LAS)	Lightweight Barcelona
90015	Ubbink Vent (MMS) - White	Standard Weight Mission "S"
90012	Ubbink Vent (MCL) - White	Cedarlite/MonierLifetile Madera

## Vents

### Zephyr Vent™

- 50-54 inches Net Free Airflow for increased attic ventilation, resulting in reduced cooling costs
- Provides superior performance in an aesthetically enhanced design
- Low profile tile mimicking design blends with surrounding field tiles
- Paintable to match surrounding field tile
- High impact polystyrene body
- Tile clip for maximum wind uplift resistance
- Rain guard to prevent wind driven rain from entering the vent
- Included mesh sub flashing reduces insect and rodent invasion
- Locks securely into surrounding field tiles

Part Number	Description	Profile
90870	Zephyr Vent - White	Standard Weight Mission "S"
90961	Zephyr Vent - White	Lightweight Barcelona
90871	Zephyr Vent - White	Lightweight Villa
90873	Zephyr Vent - White	Saxony
90962	Zephyr Vent Metal Vent Screen (optional)	

## Miscellaneous

### Roof Layout Tape

- Eliminates course calculations
- Easy, cost effective, accurate
- Assures code compliance by establishing proper headlap for tiles
- Eliminates the need to mark off the roof

Part Number	Description	Profile
90081	Roof Layout Tape 13.5"	Barcelona/Villa/Mission "S"/Saxony
90082	Roof Layout Tape 10"	Cedarlite/MonierLifetile Madera
