

(Clarifiers, digesters, pumping stations, etc.) Schematic sketches

ⓐ

at expansion joints. Refer to No. 1.1.3-15 for details.

ⓑ

Above ground tanks:

tanks:

[1/16"] (1.6 mm) thickness to walls and floor, wherever rain or groundwater (negative side) pressure can be expected (i.e. inground structures, etc.). See application rates on AQUAFIN-2K/M data sheet.

Note: Use epoxy coatings in H₂S environments.

Refer to standard specifications and product data sheet for further information.
