

# EQUITONE EXPOSED FASTENER USING HORIZONTAL GIRT SYSTEMS ON STEEL STUD CONSTRUCTION

UNI-Fixing Sliding Point

UNI-Fixing Fixed Point

Subframing Sliding Point

Subframing Fixed Point

## NOTES:

1. The following is a representation of the importance of allowing the sub-framing system to expand and contract in addition to the movement within the UNI-fixing systems. These are general guidelines and do not encompass all situations.
2. Recommend maximum rail lengths to be 10'-0".
