ProSeries Gate Latch

A cross-sectional diagram of a steel beam. The beam is shown in two parts: a top flange and a web. The top flange is coated with a thick layer of E-Coat, which is further treated with a Zinc Phosphate Coating. The web of the beam is made of G-60 Pre-Galvanized Steel, which is shown with a dotted pattern representing the galvanized surface. Labels with leader lines point to the E-Coat, Zinc Phosphate Coating, and G-60 Pre-Galvanized Steel.
