

Door - Non-Load Bearing Single Track Header Boxed Jamb

ADVANTAGES:

1. Use of cripple stud to receive head/sill tracks at the jamb studs helps maintain alignment of finishes.
2. Boxed jamb studs welded together reduces material build-up and finish problems.
3. Provides better load transfer from jamb stud to base track vs. single jamb stud.

DISADVANTAGES:

1. High-end reactions for single web jamb studs may require reinforcement to reduce web-crippling failure.
2. Requires 43 mil and thicker jamb stud material so weld can be made easily.
