

Boral Steel® Architectural Details are divided into three (3) categories based on the install method used:

BATTEN (Panel is exposed fastened & mounted onto a wood 2x2 batten or steel hat channel)

DIRECT (Panel is exposed fastened & mounted Direct-to-the roof-deck)

GRANITE-RIDGE Shingle (Panel is hidden fastened & mounted Direct-to-the roof-deck)

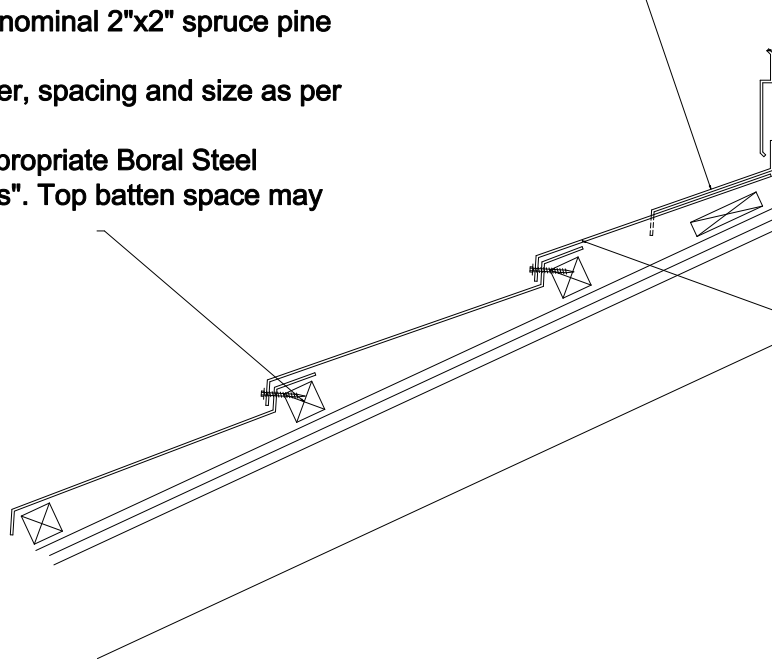

Architectural details provided for Boral Steel® customers only

***Batten Fasteners omitted for clarity.**

See fastening drawings for panel and batten attachment.

Bird-Stop: Install Bird-Stop with a fastener into each top of the panel Barrels.
Foam Closure is needed for water stop.

Battens: to be nominal 2"x2" spruce pine fir #2 or better.
Fastener number, spacing and size as per fastener chart.
Install using appropriate Boral Steel "Batten Spacers". Top batten space may be "Short".

Boral Steel "Z" Bar: Fasten with appropriate fastener 12" O.C. maximum.
Seal top with approved sealant

Roofing Underlayment: Turn up 3" min at headwall.

Panels: Cut "Short Course" as needed to fit panel and batten lay-out. Use 1"x4" spruce pine fir #2 or better to support cut panel.

Profiles:

PINE-CREST Shake

BARREL-VAULT Tile

PACIFIC Tile

Batten Spacing
