

Boral Steel® Architectural Details are divided into three (3) categories based on the install method used:

BATTEN (Panel is exposed fastened & mounted onto a wood 2x2 batten or steel hat channel)

DIRECT (Panel is exposed fastened & mounted Direct-to-the roof-deck)

GRANITE-RIDGE Shingle (Panel is hidden fastened & mounted Direct-to-the roof-deck)

Architectural details provided for Boral Steel® customers only

****Panel fastener lengths have been exaggerated to show that they must penetrate the decking and/or structural member.***

Fasten at both the back flange and through the nose of the Boral Steel panels and penetrate the structural member a minimum of $\frac{3}{8}$ ", as shown in "Direct-to-Deck Fastener Detail".

CAP Mission: Fasten at sides.

Panels: Bend and cut top course "Short Course" as needed to fit batten lay-out.

Roofing Underlayment wrap minimum 1" over finish edges

CAP Shake Ridge Trim: Fasten at sides. Seal and chip exposed screw.
