

DOUBLE LAP TILE (NON-INTERLOCKING)

MC-10D

Notes:

1. For recommended underlayment and fastening requirement, see Table 1A and 1B.
2. A eave drip edge flashing is required at all down slope perimeter edges.
3. Dimensions shown are minimums and are intended to be approximate to allow for reasonable tolerances due to field conditions.
4. Standard head lap equal to tile length minus 2" divided by 2.
