

New Fabric Colors

Arctic White and Linen

Primacoustic introduces two brand new colors to the palette, giving more options for customers to create great looking and sounding rooms. "Linen" and "Arctic White" are available now on select wall and ceiling panels, as well as the latest Clarity Room Kit (designed for boardrooms and office spaces).

Linen is a soft neutral beige, specifically selected to fit in with modern décor. In addition to the current Beige (color code: 03), Linen is another option for those looking to add complementary natural colour to their space.

Arctic White is a sharp, ultra-clean, white fabric option to join the popular Paintable White. For installs where white panels are optimal, Arctic White will seamlessly blend into the aesthetic of the room and create an instant impact on intelligibility.
