

Shaw Barrier Defense Systems Green/LEED credit data that can contribute LEED credits to a building project's LEED certification are as follows:

- Products which contain pre-consumer recycled content
- Products which contain post-consumer recycled content
- Products which are recyclable after use
- Low-emitting paints, sealants and adhesives
- Material ingredient reports / certificates
- Local / regional materials
- Environmentally innovative designs

Shaw Stainless companies will make every effort to meet all LEED categories applicable to our product offering assisting our customers to achieve the LEED standard desired. Please be sure to notify us in advance of any orders so we are sure to apply any possible category points as possible. We work directly with various steel mills to achieve maximum recycle content available and when possible geographical locations that can be contributors as well.
