

TruFlush™ by Stockton Products™

Stockton Products™ announces the release of its patent pending TruFlush™ drywall backing.

(North Las Vegas, NV) For Immediate Release

Stockton Products™ announces the release of its patent pending TruFlush™ drywall backing, an innovative product designed to support wall mounted rails, grab bars, and wall mounted equipment and devices. As an alternative to notch track and flat strap, TruFlush™ backing installs 50% faster with fasteners on the inside of the metal studs and more importantly, acts as an insurance policy to install drywall correctly the first time avoiding back charges for popped fasteners and refloating finished drywall. TruFlush™ backing is custom designed and fabricated to match all major stud manufacturers for a perfect fit every time. Follow the link below for product specifications and to identify your local building supplier with your requirements.

More information, including data sheets, load testing data plus an installation video.
