ABOUT THE CHEMISTRY

The heart of the Kynar® PVDF emulsion technology is the carbon-fluorine (C-F) bond, which is the key ingredient in NeverFade® formulations. The C-F bond is one of the strongest bonds known and it is the basis for extreme weatherability, withstanding harsh thermal, chemical, and ultraviolet environmental conditions.

INTENDED FOR USE ON

NeverFade® Original: Primed Wood, Stucco, Vinyl, Masonry, Concrete, Fiber Cement and EFIS

NeverFade® Metal Restoration: Primed Steel, Aluminum, Galvanized, Galvalum and Coil Coated Metals

CUSTOM COLORS

NeverFade® is custom color matched to order. Standard colors are available in mica or solid options.
