

AirDeck Spacer

PRODUCT OVERVIEW

The spacers for The AirDeck system are an essential accessory for the dry installation of outdoor raised flooring, using AirDeck Grid as the support base. Thanks to the spacer tabs, they allow for the precise placement of pavers in any format, ensuring a uniform and long-lasting grout line. If needed, the tabs can be easily cut, and thanks to the pre-incisions on the head's plate, it can be divided into up to 4 parts, enhancing functionality for specific installation points. The properties of the material used confer an anti-shock function, reducing footstep noise by cushioning the contact between the tile and the AirDeck Grid while ensuring sufficient friction to keep the pavers in position.

KEY SPECIFICATIONS

- Compatible with Cityscape AirDeck Grid
- 1/8" spacing tabs

FEATURES & BENEFITS

- Spacing: Provides uniform spacing between pavers
- Quick Installation: Speeds up project timelines by eliminating fasteners and heavy tools
- Made of lightweight and environmentally friendly, recyclable materials
- Material used for the Spacers is resistant to degradation caused by sunlight, ozone, and other atmospheric or chemical agents commonly present. It maintains high flexibility even at low temperatures
- Allow for the precise placement of pavers in any format
- Mechanical features stay the same over time

APPLICATIONS

- Green roofs and rooftop amenity spaces
- Urban plazas and pedestrian walkways
- Podium decks in mixed-use developments
- Temporary or permanent outdoor installations
- Modular stage and platform systems for events

INSTALLATION GUIDELINES

1. Surface Prep: Clean AirDeck Grid surface and connection points of debris
2. Installation: Place the spacer on the Airdeck grid and lay the pavers so that the edges butt up against the tabs

OPERATING TEMPERATURE

-20F ; +167F
