# Engravings

Face materials are cut to within 0.001" tolerance of specified design. Engraving depth varies with materials (typical .020" for laminates). Engraved surface is sealed but not filled.

## **Doors and Panels**

Engraved doors and panels made with a variety of materials.

#### **Pilasters**

Shoes are 22 gauge ASTM A-167 stainless steel with satin finish, not less than 3" in height.

### Door Hardware

Hinges are surface mount and strikes/keepers are wraparound style. Slide latches, coat hooks, and bumpers are surface mounted. Door pulls are through bolted. All fasteners are tamper proof.

#### Brackets

Stirrup-type one ear, two-ear, and u-brackets are provided with theft resistant fasteners.

# Considerations

- May require additional cleaning.
- · Design complexity will likely impact lead time.
- Tooling patterns may be evident in large, "clear" areas of engraving.
- Surface color and core colors should be considered.

#### 4/11/2014

Ironwood Manufacturing reserves the right to make changes in design, material, and documentation without formal notice and without incurring obligation. Consult local and national codes: conformity and compliance to local and national codes is the responsibility of the installer. Verify all roughin dimensions prior to installation.
