

ARCHITECTURAL METALS Division

Finishes: **Ourborite™**

The warmth of natural wood, the strength and endurance of metal

Ourborite™

- extremely durable, water-proof and Class A fire/smoke compliant
- applicable for the acoustics often desired for concert halls, hotels, theatres, transportation facilities and other public spaces
- available with all standard Nelson ceiling, wall and column cover systems
- Finishes are reproduced on very large master templates, reducing the risk of grain repeatability while providing desired color consistency, required for multiple panel applications

ARCHITECTURAL METALS Division

Ourborite™

A better wood finish . . . for ceilings, walls and column covers

The look of wood

Nelson Architectural is committed to bringing you innovative products that meet today's pressing demands for environmentally friendly and LEED-compliant materials.

Ourborite™ encompasses a full range of wood panel finishes that combine the beauty of natural wood with the strength, longevity and maintenance-free character of metal.

Ourborite™ surfaces instantly transform an interior space with the look and feel of natural wood.

Ourborite™ is extremely durable, water-proof and Class A fire/smoke compliant and can provide where applicable for the acoustics often desired for concert halls, hotels, theatres, transportation facilities and other public spaces.

Ourborite™ is available in over a dozen wood grains. Finishes are reproduced on very large master templates, reducing the risk of grain repeatability while providing desired color consistency, required for multiple panel applications.

Ourborite™ finishes are presently available with all standard Nelson ceiling, wall and column cover systems. Material thickness can range from .025" (0.6 mm) to .064" (1.6 mm) based on finished panel size or application.

For more information on how **Ourborite™** can be applied to your architectural project, or for samples, please contact our head office, or a representative near you.
