

GLAZED STRUCTURES

All the beauty of nature without the harsh elements.

Solar Innovations® has been creating high quality durable Glazed Structures since 1998 for both commercial and residential applications, creating a line of functional accessories and decorative elements. In order to provide the highest quality products and offer a superior installation process, the Solar team pre-cuts and pre-drills each of the structural components before it is shipped. Unlike most greenhouse and conservatory manufacturers, Solar Innovations® provides all the necessary fasteners, silicone, and flashings for your project. These services help customers reduce installation time and cost, providing a high quality final product.

FEATURES

SYSTEM:

- Unlimited configurations and designs
- 2" and 2½" interior face widths
- Overlapping construction creates positive drainage within profiles
- LEED friendly system including recycled content
- Designed and manufactured in the U.S.A.

PERFORMANCE:

- Large missile impact tested
- Thermally broken utilizing thermal fill and debridge

GLAZING:

- Designed to accommodate glazing infills from 3/16" to 1½"
- Thicker glass options depending upon engineering

OPTIONS
