

July 22, 2020

We have had a listing on ARCAT for over 10 years. Listing our products and knowing that they are being found by the right audience is an instrumental part of our marketing plan. ARCAT allows an extremely broad word search meaning that if anyone is looking for a solution our products address, they will find us even if they are not familiar with our product or company. Each account has a rep who continues to work with you after you join. Ours has been so incredibly helpful in selecting our level, coming up with key words, making updates and changes to our pages and checking in frequently. The intel we get is very valuable to our sales representatives.
